

JABRA PANACAST MEETS JOAN

The simplest meeting room booking system meets the smartest camera technology. Detect. Meet. Simple.

DID YOU KNOW?

24%

of decision makers for video conferencing say they lack (big) data to power facility management*

20%

of huddle-room-users say that their need for free meetings rooms is not supported effectively**

JOAN

Meet Joan

Joan is the simplest meeting room booking system out there

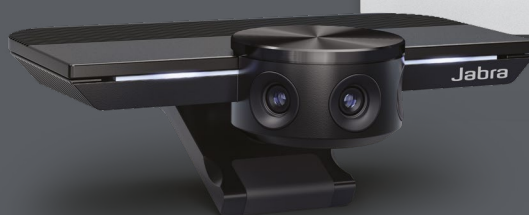

UPDATED MEETING ROOM CALENDERS IN REAL-TIME FOR EFFICIENT ROOM UTILIZATION

Joan is a digital display and booking system for easy scheduling of meeting spaces and, together with Jabra PanaCast, makes booking video conference rooms an added benefit for better collaboration and increased productivity.

FEATURES

JABRA PANACAST

- Three 13-megapixel cameras
- Panoramic-4K video
- Unique 180° field of view
- Plug-and-play technology
- Intelligent PeopleCount feature

JOAN

- Touchscreen
- 6-inch digital display
- 3 months battery life
- Booking management of meeting rooms
- Optimizes office space

UNIQUE SOLUTIONS. FIRST.

Via our software development kit (SDK), the new People Count feature in Jabra PanaCast can now be connected with Joan through their API.

Companies can benefit from real-time updated room calendars to ensure efficient room utilization. People Count technology, captured by the intelligent 180° Panoramic-4K video solution, detects participants within a meeting room allowing Joan to update room availability based on the actual usage of each room.
